PREFACE.

This number of the Santa Clara County Directory has been gotten out under some difficulties, many changes having taken place since the canvass was commenced. We made over 2500 changes and corrections during compilation and printing, showing the necessity of compiling and printing a directory in the city where it is published.

Very few persons realize the magnitude of the work of publishing a directory. For San Jose alone it involves the visiting of every public building, place of business and dwelling house in the city, and for several miles outside in every direction. Over 25,000 names must be written, arranged alphabetically, compiled (duplicates thrown out), checked and made ready for the printer, involving the preparation of nearly 3000 pages of manuscript. This copy must be revised at least three times, and even then many errors are detected by the proof reader, to the despair of the type setter, whose patience is sometimes sorely tried by the many necessary changes of copy. A casual comparison of a directory with an ordinary book will give an idea of the difficulties to be overcome by the printer.

The present book contains 16,507 names in the San Jose Department, as compared with 14,351 in the last book. A directory should include about 55 per cent of all names, married ladies and children being omitted. This would seem to show a population slightly over 30,000. Outside of San Jose the intention is to give only heads of families, or about 20 per cent, but in the towns the lists are considerably more complete, so that for the whole county, aside from San Jose, 25 per cent would be a fair estimate. There are 7055 names in this part of the book, which would give a population of 28,260 or a total of 58,273 in the county. This does not include Chinese, nor a considerable number of transient laborers, who have no fixed residence, so that a fair estimate of the entire population would be 60,000.

The publisher wishes to acknowledge many courtesies and much valuable information and assistance received from county and city officials, and from business men generally.

The work of the printers, McNeil Bros., speaks for itself, and cannot fail of being satisfactory.

Santa Clara County.

ITS RESOURCES AND ATTRACTIONS.

O MUCH has been written about California of late years that the world has come to be moderately well informed in regard to its people, its climate, its gold, its fruits, its wines and its grain. The recent exploit of the battleship Oregon, built at San Francisco, has called attention to the startling development of our manufac-When it is taken into account that the millions of horse tures. power stored in the streams having their sources in the everlasting snows of the Sierras are already being transmitted and used for light

and power in all the interior cities of the State it will be understood that California is wide awake and conscious of her infinite resources and possibilities.

However, reading and experience are different things. To fully appreciate the attractions of this favored country one must visit it; must taste its fruit, its fish, its game, its wine, its milk and honey; must feel its cooling breezes of summer and its fostering winter sun; must hear its song birds; must see its orange and lemon groves, protected by its peaks of snow; its giant trees, its silver

lakes, its myriad flowers, its fruits of all the zones in their perfection.

The paradise of this paradise is Santa Clara County. To merely give its boundaries is to show why this must be true. On the north is the great bay of San Francisco. In the summer days the wind blows through the Golden Gate a gale freighted with the ozone of old ocean. Deflected by the coast range of mountains, its force toned down to that of a summer breeze, it cools and refreshes the great Santa Clara valley. On the east the same coast range, whose highest point, Mount Hamilton, ton, is 4200 feet high, protects from the cold winds from the Sierras in winter, and from the lot breath of the great San Joaquin valley in summer. The south lies open, ready for the coming of the warm rain cloud of the winter months, the never failing harbinger of plenty. The winds and fogs of the ocean are barred on the west by the Santa Cruz mountains. Thus cradled between mountain ranges, protected from blighting frost and scorching heat, yet open to cooling breeze and enriching rain, nature can do no more.

AREA.

Santa Clara County has a mean length from north to south of about fifty-five miles. Its average breadth is thirty miles. Of its million acres of land one-quarter lies in the valley, 300,000 in rolling hills and mountain slopes. The remainder is mountainous, some rough and covered with timber, some clear and suitable for grazing. A great part of this mountain land when cleared has no superior for fruits and vines.

SOIL.

The valley in some prehistoric age was part of the bed of an inland lake, and so its soil, as might be expected, is a rich sediment. Having received for hundreds, perhaps thousands of years, the mineral and vegetable wash from the mountains—the result is "a soil more fertile than the valley of the Nile and which now produces an income larger than that from any other territory of equal area on the face of the globe."

CLIMATE

San Jose has about the latitude of Norfolk, Va., and of Sonthern Spain and the island of Sicily, but its proximity to the ocean and the cooling breezes that come from the north and are as constant as the succession of sunny days, render its midsummers delightful. The climate of the valley has none of the violent changes of the Atlantic Coast and none of the enervating effects found in southern Europe.

The late Judge Belden, for many years on the Superior Bench of the county, wrote perhaps the best description of the climate of the Santa Clara Valley that has anywhere been published.

"Beginning," he says, "with the month of October, the signs of a coming change are apparent. The winds, no longer constant from one quarter, become variable both as to direction and force, or wholly cease. Sudden blasts raise miniature whirlwinds of dust and leaves which troop over the fields, and the stillness of the night is broken by fitful gusts and the sudden wail of the trees, as the breath of the coming winter sweeps through them. These are the recognized precursors of the season's change, and are usually followed in the first ten days of October by an inch or more of rain; and this, usually, by weeks of the finest weather. The effect of these first rains is magical. The dust is washed from the foliage, and is laid on the roads and fields. The air has a fresh sparkle and life. The skies are of a deeper azure, and the soft brown hills seem nearer and fairer than before. Indian Summer of the East; but, instead of the soft lassitude of the dying year, here it comes with all the freshness and vigor of the new born spring. If in this and the succeeding months there are further showers, the grass grows up on every hand, and the self-sown grain in all the fields. The hills change their sober russet for a lively green. Wild flowers appear in every sheltered nook. Hyacinths and crocuses bloom in the gardens, and the perfume of the violet is everywhere in the air. In the latter part of November the rainy season is fully established. A coming storm is now heralded by a strong, steady wind, blowing for a day or two from the south-east, usually followed by several days of rain, and these are succeeded by days or weeks without a cloud—and thus alternating between occasional storms and frequent sunshine is the weather from October to April—the rainy season in California. The amount of rain that falls varies materially with the locality. In San Jose it is from fifteen to twenty inches, while in places not ten miles distant, twice that amount is recorded. During this period there are from thirty to forty days on which more or less rain falls, from fifty to seventy days that are cloudy, the rest, bright and pleasant. These estimates will vary with particular seasons; but taking the advantage of a series of years, it will be found that from October to April, one-half of the days are cloudless, and fully three-fourths such that any out-door vocation can be carried on without discomfort or inconvenience. Cyclones and wind storms are wholly

unknown, and thunder is only heard at rare intervals, and then as a low rumble forty miles away in the mountains. With the month of March the rains are practically over, though showers are expected and hoped for in April. Between the ist and toth of May a slight shower may not be unexpected, but it causes no particular damage or inconvenience. By the ist of July the surface moisture is taken up and dissipated, and plant growth dependent on this ceases. The grasses have ripened their seed, and, selfcured and dried, are the nutritious food of cattle and sheep. The fields of grain are yellow and ripe, and wait but the reaper. Forest trees and shrubs have paused in their growth. This, to the vegetable world, is

the season of rest.

IN SPRING-TIME.

This is the winter of the Santa Clara valley—winter, but strangely unlike winter elsewhere, for here man has interposed. Here by art, and by labor, he has reversed the processes of Nature and constrained the courses of the seasons. In gardens bright with foliage and resplendent with flowers there is spring in its freshness and beauty, while, in orchards teeming with fruits, and in vineyards purple with ripening grapes, summer and autumn vie for supremacy. And so, with changing beauty and ceaseless fruition, pass the seasons of this favored clime."

The average number of clear days per year is 300. Average temperature of the months of June, July and August 74°. Average temperature of the months of December, January and February 52°. Average number of days in the year when temperature is higher than 85°, 14. Average number of days in the year when temperature is

below 35°, 4. The observations upon which above figures are based were made by the United States Signal Service Bureau every day at 7 a. m. and 2 p. m. through a series of years and may be relied upon as substantially correct.

The average rainfall in San Jose is about 19 inches, confined to the months of October to March inclusive, though there are occasional showers in April and May. In some parts of the county the fall is much greater.

PRODUCTS.

The climate and soil of Santa Clara County seem equally adapted to the cultivation of grain, fruits or vegetables. Horticulture, however, is attracting most attention and giving largest returns on investments. All the fruits and nuts of the semi-tropics and temperate zone flourish in abundance and perfection.

There are now (July 1, 1899) in the county, according to the report of the County Assessor, 4,760,145 fruit and nut trees (about 47,000 acres), of which 3,532,915, or 35,000 acres, are in full bearing. In addition to this there are about thirty millions of vines (12,078 acres). The principal fruits included in the above figures are apples 31,365, apricots 545,120, cherries 160,130, almonds 21,555, olives 16,410, peaches 546,915, pears 142,095, prunes 3,278,200, quince 1,410, orange 1,570, lemon 1,075, walnuts 11,135, figs 2,200. Figures of fruit shipments from San Jose for the past year are not at hand, but in 1895 there was shipped overland from San Jose alone 111,410,475 pounds or 3,714 carloads. The amount has increased considerably each year since.

This season there are also 7,920 acres of wheat, 8,450 of barley, 159 of corn 325 of potatoes and 27,013 acres of hay. Other fruits, vegetables and grains are grown in smaller quantities. [Brandies assessed in 1899, 102,620 gallons; wines, 1,510,150.] Near the town of Santa Clara are the largest seed farms in the world. Hundreds of acres are devoted to garden and flower seeds of all possible varieties. Of carrots and cabbage there are 15 varieties grown; onions 20, lettuce 75, 100 of sweet pea. One farm, owned by C. C. Morse & Co., containing 1,200 acres, grows garden and flower seeds the year around, being suppled with water for irrigation purposes from four artesian wells. All kinds of vegetables are planted immediately after the autumn rains begin and grow throughout the winter—the most tender varieties of lettuce, cabbage, etc., very rarely suffering from frost.

In the eastern and southern parts of the county stock in considerable number is raised. Some large dairies are located near Gilroy, where the finest butter and cheese are made. The largest and best equipped horse farm in the world is at Mayfield.

For several years tobacco has been grown near Gilroy of a quality fully equal to any grown in the Eastern or Southern States, the warm sunny climate being specially adapted to its growth.

To describe, or even mention, in further detail the products of this favored valley is unnecessary in such a sketch as this. Suffice to say

that soils and climatic conditions exist here favorable to the production of nearly everything that grows.

PRICES OF LAND AND PROFITS.

Land in Santa Clara County is not cheap either in price or quality. To a man who has sold a farm in the Mississippi valley, which he has improved and brought to a high state of cultivation, for \$50 or perhaps \$75 an acre, \$150 an acre for unimproved land seems a high price, but when the income is taken into account, the discrepancy disappears. From his Illinois or Iowa land he will do well if he realizes \$10 an acre net, which we will say is 15 per cent on his investment. A Santa Clara County orchard when in full bearing has cost him \$150 an acre for the land and say \$100 an acre for planting and cultivation, or, if he prefers, he can save the time required for development by buying his orchard at about \$300 an acre. The net income from this land will not be less

A SANTA CLARA COUNTY ORCHARD.

than \$75 per acre or 25 per cent on his investment. Experienced fruit growers say that taking the average of the years they can make a net profit of \$100 a year per acre. These may seem large figures, but for the past five years, the average income from 30,000 acres of orchards in this county has been more than \$75 per acre. In many instances profits from \$400 to \$600 an acre have been realized in single years. This year orchardists sold their cherries at 20 cents per pound, realizing from \$500 to \$1500 an acre, depending upon the age of the trees. Unimproved fruit lands may be had at \$75 to \$250 per acre, depending chiefly upon location. Orchards in full bearing, where owners are for some reason anxious to sell, go as low as \$250 an acre, but more often are held at \$350 to \$600, including fair improvements.

TAXES.

Large sums of money are used annually in public improvements and maintaining those already made. The public school fund amounts

to about \$300,000 annually. Over \$100,000 a year is spent on public roads, which are the best in the State. All public roads in the county are sprinkled every day throughout the dry season, keeping them in excellent condition. The county has no debt, and only needs to raise by taxation sufficient funds for current expenses. That the people are fairly well satisfied with the conduct of county affairs is evinced by the fact that delinquent taxes rarely amount to more than \$250, though the amount raised annually averages about \$650,000. The rate of taxation is lower than in any other county in the State except Yolo. Statements furnished by the Assessor to the Board of Supervisors for the past five years give the following figurs:—

YEAR.	VALUATION.	RATE PER \$100.	AMOUNT RAISED.
1894	\$56,512,650	\$1.25	\$640,752.32
1895	n 56,728,125	1.45	755.919.55
1896	59,524,700#	1.30	704.409.12
	50,629,867†		
1898	51,228,807	1.40	657,745-54
* According	raised to her State Board	of Equalization	

^{*}Assessment raised 5% by State Board of Equalization.

PEOPLE.

The population of the county in 1890 was 47,895. At present it is about 60,000. It is cosmopolitan in character, though a great majority are Americans. The county originally was settled by the Spanish, and about 5 per cent of the present population are of that nationality.

INDUSTRIES.

The industries of Santa Clara County, while many and somewhat varied, are not equal to the increasing demands. Chief among them is of course the fruit industry. Canneries and fruit drying plants, with their acres of floorage, thousands of fruit trays and miles of track, abound in all sections of the valley. Some idea of the extent of the canning industry may be gained from the statement that a single company has canned in one day no less than 111,000 cans of fruit. Their output for the season was over 5,000,000 cans. One fruit drying yard covers over 40 acres, and they have over 40,000 trays. One firm made over 2,000,000 fruit cans, and another firm over 1,000,000 fruit boxes last season. The lumber trade is also a heavy industry in this county, the freightage of one firm being over \$100,000 per year. Clothing is made here from cloths manufactured at the San Jose Woolen Mills. Many of the largest buildings in San Francisco have been supplied with San Jose terra cotta. Our elegant new Hall of Records was built by our Western Granite and Marble Company. The stone for our new Government postoffice came from the Greystone Quarry, six miles south, which quarry also supplied the stone for the Leland Stanford Jr. University. Our building trades industries, wood and metal working, household and general supply factories, etc., are, however, unequal to the demands of our section, and many lines of goods that should be made here are purchased abroad. Time alone will remedy these shortcomings. Agriculture and stock-raising are also important industries with us. So is dairying and the manufacture of cheese. Manufacturers of agricultural implements, wagons and

[†]Assessment reduced 10% by State Board of Equalization.

carriages, tanneries, flour mills, wineries, breweries, windmill factories, brick and lime kilns, ice works, glove and box factories, etc., give employment to many hundreds of our people, and the trade of these

concerns is scattered throughout the State.

At New Almaden, twelve miles south of San Jose, are located the richest and most productive quicksilver mines in the world, excepting only the Almaden mines in Spain. The location of the ledge was known to the Indians, who used the vermilion for face paint, at least three-quarters of a century ago. In 1822 they told Luis Chabolla and the Robles family concerning the ore, and in 1824 Senor Robles showed it to Don Antonio Sunol. The latter, supposing that the bright globules in the ore were silver, spent a year and \$400 in trying to extract it. During the succeeding twenty years no efforts were made toward its development.

COURT HOUSE AND HALL OF RECORDS, SANTA CLARA COUNTY.

On November 12, 1845, Andres Castillero, a Mexican officer sojourning at the Mission Santa Clara, examined the ore, and pronounced it cinnabar. He filed a claim upon the ledge on November 22, 1845, and formed a company with a view of development. The property in 1864 passed into the hands of The Quicksilver Mining Company of New York, by whom it has since been operated. They paid for the mine \$1,700,000. Up to March 6, 1891, the product amounted to \$14,939,055.41. The land owned by the company aggregates 8,500 acres.

PUBLIC INSTITUTIONS.

THE CALIFORNIA HOSPITAL FOR THE INSANE

Is located at Agnews, seven miles north of San Jose. It has a magnificent building of stone and brick, three stories high, with the administration building four stories. It has a frontage of 750 feet by 400 in depth and cost \$800,000. It has 275 acres of grounds surrounding it, which are devoted to orchards, gardens, pastures and hay fields. The

institution is controlled by a board of trustees, appointed by the Governor.

THE COUNTY COURT HOUSE AND HALL OF RECORDS

Are fine buildings, costing in the aggregate about \$700,000.

There may also be mentioned the County Hospital and Alms House, both supported at public expense, but in a measure self-supporting by reason of the cultivated lands surrounding them.

The aggregate value of public buildings and grounds owned by Santa Clara County is \$1,500,000.

EDUCATIONAL.

Santa Clara County may, with propriety, feel proud of its educational advantages. From kindergarten to university the way of the learner is made pleasant, and all things necessary to his rapid and easy advancement are provided. In the county are eighty-three school districts, employing 273 teachers. The value of public school property is \$608,219, and the amount expended for support of public schools is more than \$300,000 annually. Teachers receive liberal compensation and the result is that the schools have the service of the best educators. The average monthly wages paid to teachers in all grades is \$65 per month.

The average annual expenditure in the United States for each scholar attending public school is \$17.62. In the North Central States it is \$19.96; in the North Atlantic States, \$23.65; in the South Atlantic States, \$8.25; in the South Central States, \$7.59; in Santa Clara County, \$26.07; children in the county between five and seven years of age, 14,340; enrolled in the public schools, 10,223.

THE STATE NORMAL SCHOOL.

This institution is located at San Jose, occupying a building costing about \$200,000. It is conceded to be one of the best schools for the training of teachers that exists anywhere. It has a library of many thousand volumes, a training room well supplied with wood and iron working machinery; a clay modeling room; chemical and physical laboratories, and in all departments is fully equipped with most approved apparatus and appliances. Total attendance is about 900 students.

THE LICK OBSERVATORY.

The fame of the great Lick Observatory on Monnt Hamilton is now world-wide, and thousands of people visit it annually, each one of whom assists in heralding to the world the delights of the trip and the intense interest which attaches to the Observatory and its unique attractions. The trip from beginning to end is calculated to create impressions that will be stamped indelibly upon the mind.

The Observatory is twenty-eight miles from San Jose by stage road and thirteen miles in an air line. It is one of the grandest roads in the State—wide and of easy grade. It leads eastward from San Jose

on the Alum Rock road five miles to the foothills, along a wide avenue, bordered a distance of several miles on either side with rows of eucalyptus and cypress trees; thence winding up and over foothills graceful with undulating vineyards and rows of fruit trees that converge and diverge, crowning knolls and reaching far up into the mountains.

The road bends into ravines and rounds jutting points, ever rising, the view growing constantly grander and more extended. The valley begins to appear like a map, each orchard with its rows of trees distinctly outlined; white houses everywhere dotting the plain. Then around hillsides where black oaks and mountain laurel bend over the road, and wild flowers bloom in profusion amid luxurious grasses that everywhere cover the hills, the ravines and the roadside. Hall's Valley, rich with grainfields, and rolling hills covered with green oaks greets the view, making a picture of great beauty. Over another range and Smith's Creek is reached, where the hungry traveler finds a

STATE NORMAL SCHOOL.

good hotel and a good meal awaiting him. The excellence of the water is noted by all, and the ranch butter and thick cream are remembered ever after.

The mountain climb really commences here, the road zig-zagging up the hill with lundreds of curves in order to insure a lighter grade. As one rounds the turn a glimpse of the observatory is caught, apparently just above, yet it can only be reached by a long, round-about climb. Hidden from view one moment, it seems to stand out more boldly as the stage rounds the next jutting point. The view rapidly broadens until the summit is reached. Here the scene is indescribably grand—a poem without words. The great Bay of San Francisco stretches away to the north, while the Santa Clara Valley is spread ont like a map from Palo Alto on the north to Sargents on the south. Across the valley the Santa Cruz Range with its blue mountains uprears against the ocean, its redwood forests fringing against the

western sky. Through a gap in the Coast Range to the east the Sierra Nevadas may be seen, snow capped and dim in the distance, overhung with the fleecy clouds that characterize that region in summer. Lower down may be'seen upon clear days a wide stretch of the great San Joaquin Valley. Nearer the pine-clad hills are deep, steep canyons, where the buzzards soar on tireless wing above abysses awful in their grandeur. The observatory was given to the world by James Lick, who left an estate of \$3,000,000, nearly all of which was devoted to public use, \$700,000 being given to provide for the construction of the largest telescope in the world and its installation on Mount Hamilton. The whole cost of the establishment was \$610,000. remaining \$90,000 is invested, as an 'endowment fund. The interest npon this is insufficient for the support of the observatory, and the deficiency is made up by annual appropriations from the income of the California State University. Congress originally granted as a site for the observatory 1,350 acres. Other tracts have since been purchased by the State and by private parties, making the total area of the reservation 2.581 acres. The road to the summit of Mount Hamilton was built by the county at a cost of \$78,000.

The Observatory consists of a main building containing computing rooms, library and the domes of the 36-inch equatorial, and the 12-inch equatorial, and detached buildings for the meridian circle, the transit, the horizontal photo-heliograph, the portable equatorial and the Crocker photographic telescope. On the grounds are dwelling houses for the astronomers, students and employes, and shops for the workmen. The Observatory is fully provided with instruments, the most important of which are the 36-inch equatorial, the Crossley reflector, the 12-inch equatorial, the 6½-inch meridian circle, the Bruce spectroscope, a 4-inch transit, a 4-inch comet-seeker, a 5-inch horizontal photo heliograph and the Crocker photographic telescope. There are, besides, many minor pieces of astronomical, physical, neteorological and photographic apparatus, including spectroscopes, seismometers, photometers, micrometers, clocks, chronographs, etc.

Students who are graduates of the University of California or any college of like standing are received at the Lick Observatory to pursue a higher course of instruction in astronomy. Quarters are assigned to them at Mount Hamilton and in return they are required to execute such computations as may be assigned to them. They must furnish their own text books, food, etc., but no fees or charges of any sort for instruction are required from students in the University.

The observatory buildings are open during office hours every day in the year. The various instruments can be seen at any time during office hours when not in use and when the work of the Observatory will allow; they are also at the disposition of visitors from 7 to 10 c'clock on Saturday evenings. This gives freer access than is allowed to any other observatory in the world. The uniform courtesy and attention extended to visitors by the Professors here is the subject of wide comment. Those visitors who come in the daytime are personally conducted through the various buildings, and the uses of the instruments are explained to them. On Saturday evenings each visitor is shown the nost interesting celestial objects through the 36-inch and

12-inch equatorials. Some of the Professors are usually present, and no pains are spared by them to make these visits pleasant and profitable. Lectures are given by the astronomers at different times and places, and all specially interesting observations and discoveries are described in the magazines and the daily press. In these and other ways the observatory is made directly useful to the public, and it is an important factor in the intellectual advancement of the nation.

It is impossible to describe in detail the scientific work which has been and is being carried on. Much of it is of a technical nature and uninteresting to the general public. It may be said in a general way that ten new comets, a great number of double stars, and Jupiter's fifth satellite were discovered here. The photographs of solar eclipses have put a new face on the constitution of the solar corona, and the photographs of sunspots awaken the most intense interest. The photographs of the moon's surface, taken at short inter-

THE LICK OBSERVATORY.

vals during its entire age, are the most interesting and satisfactory that have ever been taken. By enlarging the photographs the mountains and their shadows, with the tremendous craters that scar the surface,

can be seen with great detail, and the heights of the mountains can be determined with nicely. With the great Lick Telescope any object upon the moon 200 feet high can be seen.

Broad-gauge depot at San Jose, 88.7 feet; Junction House, 399 feet; Grand View House, 1,500 feet; summit between Hall's Valley and Grand View, 1,838 feet; Hall's Valley, 1,543.5 feet; Smith's Creek Hotel, 2, 146.2 feet; marble floor of the Lick Observatory, 4,209.46 feet; top of the cover of the Kepler reservoir, 4,246.20 feet.

36-INCH EQUATORIAL, LICK OBSERVATORY.

STANFORD UNIVERSITY.

The most richly endowed institution of learning in the world is Leland Stanford Jr. University, founded by the late Senator Leland Stanford, and located at Palo Alto, seventeen miles north of San Jose. For the purposes of liberal endownent, Senator and Mrs. Stanford executed a grant to trustees for the University, conveying the estates known as the Palo Alto Farm in Santa Clara County, the Gridley Farm in Butte County and the Vina Farm in Tehama County.

The Palo Alto property was Senator Stanford's country home and is one of the finest private estates in America. It lies along the Southern Pacific Railroad between Palo Alto and Mayfield and contains 7,200 acres. The parks, gardens, orchards and vineyards which surround the mansion occupy 300 acres. The University buildings, lawns and grounds occupy a similar area. The famous Stanford stock farm occupies the remaining 6,600 acres. Senator Stanford was a lover of horses and in his life-time devoted much attention and vast sums of money to their breeding, training and development. At his farm were raised and trained many of the fastest horses in the world.

It is now, through the excellent management of Mrs. Stanford, a source of considerable income to the University.

The Gridley Farm contains 22,000 acres, devoted to the raising of wheat.

The Vina farm, the largest of the three estates, contains 59,000 acres. Its original cost was \$1,000,000. After it came into his possession Senator Stanford planted upon it 3,000,000 vines, making it the largest vineyard in the world.

In the aggregate these estates contain 88,200 acres. All are thoroughly improved and supplied with buildings, tools and all necessary appliances for their successful operation.

At the time the grant to the university was made the estimated value of the Palo Alto property was \$1,200,000; the Gridley farm \$1,600,000, and the Vina farm \$2,500,000, aggregating \$5,300,000.

In addition to the real estate, the cash endowment, used for buildings, libraries, museums and equipments and for funds for current expenses, amounted to about \$7,000,000 more, making the total endowment at that time about \$12,000,000. These properties have since increased in value, and at present are estimated to be worth \$15,000,000.

Since the founding and establishment of the university the death of Senator Stanford has occurred (June 21, 1893), and Mts. Stanford has carried forward the great work with marvelous energy and judgment. Recently, before starting on an extended tour abroad, she transferred to the university lands, bonds, securities and other personal property amounting in value to over \$15,000,000 more, so that now the aggregate endowment is upwards of \$30,000,000.

The University proper comprises a series of buildings grouped around a quadrangle 586 feet long by 246 feet wide. The enclosed space is laid with bituminous pavement, except where the soil is devoted to the growth of tropical plants and flowers. Opening from the arcade are the various class rooms, laboratories, etc., used in the practical work of the University.

The Dormitories are east and west of the quadrangle. Encina Hall, for young men, 312x150 feet, is four stories high and is provided with electric lights, hot and cold water, steam heat, ample baths and furniture, and accommodates 315 students.

Roble Hall, for young women, is of concrete, and about one-third the size of Eucina. It is fitted up in the same manner and accommodates 100 students.

On a high terrace south-east of the quadrangle are the residences of the members of the Faculty, all of modern architecture and elegantly furnished. The museum is north of the main buildings and is 313x156 feet.

A GLIMPSE OF STANFORD UNIVERSITY, FROM THE HILLS.

In the rear of the main buildings are the mechanical laboratories, work shops, power houses, etc. There are also numerous other buildings, such as gymnasiums, etc.

The architecture chiefly employed in the construction of the building is Moorish, based upon that of the old missions founded by the Franciscaus. The main structures are of Santa Clara County brown stone, obtained at the quarries near New Almaden. At present there are about 1,500 students enrolled, who come from every State in the Union, and nearly every foreign country.

The Faculty comprises some of the most noted educators that the world has produced. David Starr Jordan, President of the University, has a world-wide reputation, both as an educator and a writer.

SANTA CLARA COLLEGE,

Located at Santa Clara, is the pioneer educational institution of California, having been founded March 19, 1851, by the Society of Jesus. It occupies commodious and extensive buildings surrounding a quadrangle of about ten acres, which is laid out in lawns, flower gardens, orchard and play grounds. The college has classical, scientific and business courses and a preparatory department.

Aside from the usual features common to most colleges, this institution is remarkable for its completeness of equipment in several special departments. The physical laboratory is unsurpassed in the United States. There is a collection of more than 450 instruments and machines—electrical, mechanical, optical, astronomical. There are nine sectional libraries devoted to the requirements of special departments and a main library of 12,000 volumes.

THE UNIVERSITY OF THE PACIFIC

Is located at College Park, midway between San Jose and Santa Clara. Founded in 1851, it has gradually grown until at present it occupies numerous large and commodious buildings, and is supplied with libraries, museums, laboratories, astronomical observatory, etc.. and offers excellent opportunities for higher education under Christian influences. Eli McClish, D. D., the well-known educator and divine, is president of the University.

COLLEGE OF NOTRE DAME.

Founded in 1851 by the Sisters of Notre Dame, is located in San Jose. It has primary, academic and collegiate courses and is well equipped with libraries, laboratories and all needful appliances.

ST. JOSEPH'S COLLEGE.

Conducted by the Fathers of the Society of Jesus, is located at San Jose. It has preparatory, commercial and classical courses and occupies a handsome three-story building. It is for day students only and has desks for 200.

In San Jose are also located two business colleges—the San Jose Business College and Training School and the Garden City Business College—both excellent institutions for the field they are designed to cover.

Numerous academies, seminaries, conservatories of music and private schools in various parts of the county supplement the work of the public schools and colleges.

SAN JOSE.

The City of San Jose is the County Seat and has a population of about 30,000. It is in every respect a modern city. It covers an area of about fifteen square miles, though technically the municipal boundary includes only half that space. This is the result of the rapid increase of population without a corresponding enlargement of the city limits.

It is not only a city which presents much that is beautiful and substantial architecturally, but it is a center of art and music, culture and Christianity, noted for its atmosphere of elegance and refinement. Its streets are wide and many of them beautifully paved with asphaltum. Electric, cars glide along the streets and far into the suburbs. It is brilliantly lighted, has magnificent and costly public and private build-

FROM THE ELECTRIC LIGHT TOWER, LOOKING EAST.

ings, and is furnished with all the improvements which assist in forwarding the interests of its inhabitants,

The streets of the city present an appearance which is always noted by strangers. The business blocks are, as a rule, handsome architecturally, and all the public buildings are both massive and imposing. Beautiful residences are so numerous that they always form a subject for remark among visitors from other localities. The streets are not paved with cobble stones, but with smooth and yielding asphaltum, over which vehicles roll almost noiselessly. As the streets are smooth, they are more easily swept than those paved with cobble stones and consequently present a neater appearance. The sidewalks are laid with cement or asphaltum, and the streets are sprinkled in summer, and cared for in winter.

Flowers grow here so luxuriously and with so little care that nearly every residence, however humble, has a flower garden. So numerous and beautiful are they that San Jose is everywhere known as the Garden City. Every month in the year flowers may be found in bloom.

Another prominent feature is the opportunity presented for driving. Not only are there asphaltum streets, smooth and pleasant to drive upon, but in every direction stretch away broad, hard, well-kept roads. Roads leading through shady lanes, by handsome villas and beautiful gardens, out by converging lines of fruit trees, under spreading oaks and by fields where gentle zephyrs go laughing o'er the wheat. Roads lead in every direction, and in summer nearly every road is sprinkled. Roads lead up and down and across the valley, and one may drive in sunshine or shade, among orchards, by open fields, or ascend to summits overlooking the valley. There is in our roads a variety that never fails to interest, and a beauty that always charms. There is probably no other city in the world which presents such inducements

CITY HALL.

for bicycling, as there are in the city and its suburbs lumdreds of miles of roads that can scarcely be approached for excellence.

San Jose has a number of handsome and costly public buildings. Most of them have been constructed within the past few years, and are furnished with the latest improvements in methods of heating, lighting and ventilation.

The City Hall, situated in the center of Market Street Plaza, was built at a cost of \$150,000. It is two stories high with a basement, is built of brick and stone and finished with pressed brick and stone trimmings. It is well heated, and lighted with both gas and electricity. Besides furnishing abundant room for city officers, it contains a very large, light and well-ventilated room in which is located the Public Library of over 15,000 volumes.

The Court House and Hall of Records have already been mentioned,

The Postoffice Building, completed in 1895, is also an imposing structure, substantially built, and of modern architecture. It is built of gray stone from the Goodrich quarries, and cost \$140,696. It contains two stories and a basement, and has apartments not only for the postoffice and its officers, but for other government officials. One of its features is a handsome tower containing a clock with four dials.

In keeping with the spirit of enterprise and progress which characterizes our citizens, San Jose has been provided with a fire department equipped with the latest and most efficient appliances.

San Jose is peculiarly fortunate in regard to the facilities for obtaining an abundant water supply. The mountains which surround the valley abound with streams and springs, the water from which flows through the valley to the Bay of San Francisco. Some of it is used for

power, some for irrigation, and some flows away unhindered to the sea. A portion follows down the rock strata which bend down and ontward under the valley, to rise as life-giving streams of artesian water when the rock is pierced by the drills of the wellborer.

Water may be obtained anywhere in the city at a depth varying from ten to ninety feet, and in portions of the city, artesian water may be secured at depths varying from ninety five to four hundred feet. The water supplied by the San Jose Water Company, however, is brought from reservoirs in the Santa Cruz

SAN JOSE POST OFFICE.

Mountains. The first water company was organized in 1866, with a capital of \$100,000. Water was obtained from artesian wells for about two years, when, owing to the growth of population, it was found necessary to have a more abundant supply, and the right to use the waters of Los Gatos Creek was purchased. In 1868 a new company was organized, and the capital stock was increased to \$300,000. This company at once set to work to develop the system which now exists. The capital stock was subsequently increased to \$1,000,000, great reservoirs were built in the mountains, and other extensive and costly improvements were made.

PARKS.

San Jose has three parks, two, St. James Park and Washington Square, within the city limits, and Alum Rock Park in a canyon of the Coast Range about seven miles north-east.

St. James Park is almost in the commercial center of the city and has an area of fourteen acres, filled with the finest ornamental trees and shrubs; flowers that bloom the whole year round, and lawns that are always green. Well supplied with seats, it is a favorite place for rest and recreation.

Washington Square contains about thirty acres, in the center being located the State Normal School. The grounds consist of lawns, flower beds, walks and drive ways.

THE ALUM ROCK PARK

Is one of the handsomest natural parks owned by any municipality in the State. It is situated in a canyon in the Coast Range of mountains, seven miles north-east of the city, and has an area of 580 acres.

AT THE FOUNTAIN (ST. JAMES PARK.)

Extending through the tract lengthwise a distance of several miles is the beautiful mountain stream now known as La Penitencia. It rises well up toward the summit of the mountains, and is augmented by water from springs and brooks flowing into it until it becomes a good sized stream. It goes rushing through a rough canyon, over rocky rapids, and through narrow gorges and deep pools. In a narrow place in a defile the water falls about seventy-five feet. Mountains rise on either side, and the canyon is rich in vine and verdure.

There are numerous springs within the park, some furnishing pure, and others mineral water. These are scattered along the canyon for a distance of several miles, but the majority of them are in the vicinity of the bath house. Sulphur and soda springs are the most prominent. These usually contain other ingredients, such as chloride of magnesium, carbonate of soda, iron, or lime, and other carbonates and sulphates. But one hot spring has been discovered. The water of this has a temperature of 98 degrees as it trickles from the hillside, and is probably much warmer a few feet beneath the surface.

Below the pagoda a few hundred yards the canyon widens and a broad, level plot of ground is covered with spreading oaks. Here picnics are held, and campers are allowed to pitch their tents. On the north abruptly rise steep hills almost devoid of timber. To the south the mountain slopes are thickly covered with trees and tangled wildwood. Through the center of the tract meanders the mountain stream. The scenery is naturally beautiful, and its attractions have been enhanced by liberal expenditures for improvements, such as bath houses, swimming pool, restaurant, a kiosk supplied with fountains and surrounded by flower gardens and ornamental trees and shrubs. The road

HOTEL VENDOME.

from San Jose to Alum Rock Park is for several miles perfectly straight, and the grade is not more than a few feet per mile. About half way the road commences to ascend almost imperceptibly toward the foothills. Here it is flanked with towering eucalypti, which in summer function to the traveler grateful shade. The road gradually winds up the foothills in graceful curves, and at such a light grade that in most places teams may trot comfortably.

The view from the summit of the grade is very beautiful, as it incorporates a comprehensive view of the valley with its orchards and farms, San Jose and its smoking chimneys, and the western foothills.

The San Jose and Santa Clara electric line extends to East San Jose, connecting there with a motor road, which extends to the Alum Rock bluff, from whence a footpath leads to the bath houses, a few rods distant.

STREET CARS.

San Jose's electric street car service is excellent, nearly all parts of the city being within easy reach of a line. Application has been made to the Board of Supervisors for a franchise for the construction of an electric line to Alviso for both freight and passenger traffic, connecting with the First street system and through that with the Santa Clara and Alum Rock lines. Congress having appropriated \$48,000 for the improvement of Alviso channel, these lines with the steamer lines from Alviso will give San Jose and its suburbs competing transportation to San Francisco. Upon completion of these improvements, it is understood that the Alum Rock steam dummy line will be converted to electric, making the city and suburban system the most complete to be found in any city of the size in the United States. Mr. Greeninger, who is behind the enterprise, is one of the foremost among the progressive men of the valley and has the confidence of the entire community.

EARLY MORNING SCENE ON MARKET STREET.

BOARD OF TRADE.

San Jose has a Board of Trade, organized in 1886, which has proven a powerful factor in the promotion of the interests of the county. Its members, about 400 in number, are the wide-awake, energetic business men of the community. They have established rooms at 227-229 North First street, where is maintained a permanent and interesting display of the products of the county. The secretary, Mr. Alfred Barstow, devotes his entire attention to the objects of the association, and is always ready to extend its courtesies to tourists or visitors from abroad. The officers of the board are as follows: A. C. Darby, president; A. Barker, vice-president; Ernest Lion, second vice-president; Alfred Barstow, secretary; E. Deutsch, treasurer; Archer & Archer.

attorneys. Directors—A. C. Darby, C. M. Hatcher, R. J. Langford, Ernest Lion, A. Barker, S. E. Smith, W. F. Lenzen, E. H. Wemple, E. Dentsch.

HEALTH.

Epidemics are unknown in San Jose. Its drainage system, upon which more than half a million dollars have been expended, is complete; its public water supply pure and ample; it has no fogs or piercing winds; no freezing cold or scorching heat; no floods, no droughts; just sunshine, fruit and flowers. The annual death rate per 1000 in San Francisco is 18,33; in Sacramento, 16,78; Los Angeles, 15,82; Stockton, 15,33; Oakland, 14,45; Alameda, 13,40; Fresno, 11,92; San Jose, 11,78.

IN APRIL (LEMONS.)

RELIGIOUS.

Nothing more certainly shapes the destiny of a community than the moral tone by which it is characterized. There is scarcely a section of Santa Clara County, however remote, in which there is not a church building of some kind. In every town in the county which is more than two years of age a number of church societies are represented, while in San Jose there is a great variety, and many handsome and costly buildings. Some of the congregations are comparatively small, but most of them are large, ranging from 200 to 900 people, and in the aggregate form a religious influence which enters into, and to a great extent regulates business and society. The list of church organizations in San Jose is so large that there are few people who may not in some of them find pleasant associations and a satisfactory church

home. There are forty-one organizations, and twenty-nine church edifices. The cost of the buildings range from \$1300 to \$90,000, and San Jose numbers among its ministers some of the most prominent in the State.

FINANCIAL.

\$2,000,000, and deposits amounting to \$4,000,000. There are also three prosperous building and loan associations. There are banks at Santa Clara, Gilroy, Los Gatos, Palo Alto and Campbell, which accommodate the business in their respective localities.

IN JUNE (APRICOTS.)

NEWSPAPERS.

There are three daily papers published in San Jose, one morning and two evening. The morning paper, the Mercury, now published by The Mercury Publishing Company, was established in 1861 by J. J. Owen, who retained a controlling interest until 1884, when Charles M. Shortridge purchased a majority of the stock, which he retained until 1898. The present stock company includes many of the most prominent men in the county. Clarence M. Wooster is editor and manager.

H. H. Main is manager and W. M. Webster editor of the Herald.

C. W. Williams is publisher of the Evening News.

Numerous weekly and monthly papers and periodicals are also published in Sau Jose.

There are three papers published in Gilroy, two in Los Gatos, two in Palo Alto (besides two published by the students of Stanford University), two in Santa Clara, and one each in Campbell, Morgan Hill and Mountain View.

Other towns of importance in the county are Santa Clara, only three miles west of San Jose, with a population of 3,000. Los Gatos, at the foot of the Santa Cruz mountains, ten miles south-west. Gilroy,

A SANTA CLARA COUNTY ROAD.

thirty miles south, and Palo Alto, the seat of Stanford University. Numerous smaller but prosperous and enterprising towns dot the county, furnishing nuclei for its horticultural and agricultural development. All these towns are connected with Sau Jose and San Francisco by railroad and by telegraph and telephone lines. The principal ones have systems of water supply and electric light and power. Fruit farms as a rule are small, a great majority being from ten to twenty-five acres. This promotes the general prosperity, giving a heavy rural as compared with the active urban population. The thousands of retired capitalists living in towns make their population apparently excessive.

CONCLUSION.

Bayard Taylor, who knew the world as perhaps no other traveler and author has known it, predicted the time when the distance from New York to San Francisco would be covered in five days, and speaking of the Santa Clara valley, added:

"Then let me purchase a few acres on the lowest slope of these mountains, overlooking the valley and with a distant glean of the bay. Let me build a cottage, embowered in acacia and encalyptus, and the tall spires of the Italian cypress. Let me leave home when the Christmas holidays are over, and enjoy the balmy Januarys and Februarys, the heavenly Marches and Aprils of my remaining years here, returning only when May shall have brought beauty to the Atlantic shores. There shall my roses outbloom those of Pacstum; my nightingales sing, my orange blooms sweeten the air, my children play and my best poem be written."

[Portions of the above sketch are from the Mercury Souvenir of Santa Clara County, a beautifully illustrated and illumined book of 322 pages, published by the San Jose Mercury Publishing and Printing Co. Other matter is from Illustrated Santa Clara County, a valuable little hand-book published by McNeil Bros.]

EQUITABLE LIFE ASSURANCE SOCIETY

OF THE UNITED STATES.

JANUARY, 1 1899.

The Equitable Society has paid \$299,083,188 to its policy holders, and in addition now holds \$258,-369,298 of Assets (of which \$57,310,489 is Surplus), making a total of \$557,452,487. This record, covering a period of less than forty years from its organization, is over \$267,600.000 MORE than any other company has paid and accumulated within the corresponding period of its history.

Every Tontine Policy issued by the Equitable Society twenty years ago, whose Tontine period expires in 1899 has a present cash surrender value

GREATER THAN THE SUM OF THE PREMIUMS PAID.

All 20-year Tontine Endowment Policies show a return of the premiums paid, with interest at rates between

6 AND 7 PER GENT. PER ANNUM.

HENRY B. HYDE,

JAMES W. ALEXANDER,

President. Vice-President

Office Santa Clara District, 12 NORTH FIRST STREET,

SAN JOSE.

T. P. SPIERS, Manager.

EQUITABLE LIFE ASSURANCE SOCIETY

OF THE

UNITED STATES.

PURE BLOOD IS BETTER THAN
A LIFE INSURANCE POLICY.

It is almost an absolute guaranty against illness of any kind.

HOWES' VEGETABLE BLOOD PURIFIER

Will positively purify and enrich the blood. This we guarantee.

READ WHAT A SAN JOSE LADY SAYS ABOUT IT.

I have been so afflicted with nervous trouble and general debility that I was scarcely able to be out of bed. I was so nervous that the slamming of a door, even though I was looking at it, would cause me to jump and nearly scream. I also suffered badly with constituent and stomach and throat troubles. People said I looked as though I had not a drop of blood in my body. I commenced taking Howes? CELEBRATER BLOOD PERFIERS, and improved very rapidly in every way. I have gained several pounds in flesh, and my complexion, which was so sallow, is now clear. I don't have that tired, "gone" feeling, and have recovered from my nervousness. To all who are suffering I would say, try the wonderful remedy, Howes' Vagetarle BLOOD PERFIER.

N. W. corner White and San Fernando Sts., San Jose, Cal.

It is a tonic as well as purifier, promoting digestion, regulating the bowels and giving new life and vigor throughout the system

Call or Send for Circulars.

Consultation Free.

D. H. HOWES. Proprietor and Manufacturer. 325 South First St., SAN JOSE, CAL.

CONSUMPTION

For many years I have made of this disease, believing a special study

That I have discovered a positive and perma-nent cure for Consumption and all diseases of the throat and lungs, hundreds of persons

HOWES' CELEBRATED LUNG CURE

can testify. This is what a San Jose lady who was in a very critical condition when she commenced the treatment says about the remedy

I have been a sufferer from entarth and throat affection for more than twenty years. Also had more or less cough all the time, and for the past two years, very severe cough, and raised so much that I became alarmed, as consumption is hereditary in my family, my mother and sister having died with it. A triend told me about Howes' Celebrate having the died of the past two years, very family, my mother and sister having died with it. A triend told me about Howes' Celebrate having the died of the past which have been also that the consideration of the past which we have the form and the died of the died IN UNION MARKET BY A PRINCE BY A PRINCE MARKET BY A PRINCE B

854 South Second St., San Jose, Cal.

COLDS, COUCHS, WHOOPING COUCH AND BRONCHITIS

ALL YIELD READILY TO THIS WONDERFUL REMEDY.

D. H. HOWES, Proprietor and Manufacturer. 325 South First St., SAN JOSE, CAL.

\$1,000 reward will be paid to any one finding any poisonous or deleterious drugs or minerals in either of the above medicines.

W

W W In Carriages, just as much as in clothing

We have the very latest Eastern Carriages, Buggies, Phætons, Surreys, etc., and we keep our stock up to date.

We are agents for RUSHFORD WAGONS-best in the market.

We have car loads of McCORMICK REAPERS, MOW-ERS and BINDERS and keep a full line of Agricultural implements.

We have the celebrated FULTON PUMPS and GASO-LINE ENGINES: that is we TRY to keep them in stock but find it difficult, they go so fast.

If you want to see some handsome vehicles, come in.

CAMPBELL.

Post, telegraph and express offices, on the SPRR, narrow-gauge, five miles south of San Jose. It is the center of the largest fruit growing and drying section in Santa Clara county, and is rapidly increasing in population. This section is watered by the Los Gatos creek, from which irrigating canals radiate in almost every direction. Has a horticultural association with a large membership; meets monthly. There are three excellent schools within a radius of one mile, and two churches -Congregational and Methodist Episcopal. Two of the largest fruit dryers in the country are located here, besides six or eight smaller concerns and one fruit cannery. Campbell has also one bank.

MOUNTAIN VIEW.

Is situated in the agricultural region of the Santa Clara Valley, on the S. P. R. R., 39 miles from San Francisco, and 11 miles northwest of San Jose. The new part of the town has grown up near the railroad; the old town is on the San Francisco road, about 1 mile from the railroad station. It is a flourishing place and has a post, express, telegraph and telephone office.
